

RMS

: A Proud Member of FineDigital's Remote Equipment Manager Family

REPEATER MANAGING SYSTEM

*“A Cost Effective Solution
for Customer Satisfaction
& Seamless Service Quality”*

Synopsis

- Monitor repeater status and control their key parameters in the mobile network, all REMOTELY
- Provides an efficient solution for managing the mobile network with ever-increasing **complexity**
- Ready to tailor the generic solution in order to meet specific customer needs via consulting service
- Able to link repeaters from the networks with different standards (e.g., WCDMA and CDMA) or even RMS-noncompliant repeaters
- Attain the highest level of service quality via just-in-time maintenance/efficient management of repeaters and delivery of optimal call quality

Enhanced
service quality

Monitoring
equipment
remotely

Early
detection of
equipment(s)
malfunctioning

Fast
restoration
to normal
operation

Less
customer
complaints

Key Features

Via full-fledged GUI

- Monitor the repeater status (e.g., forward amplifier status and output power, etc.)
- Issue real-time alarm message(s)
- Control the repeaters' key parameters (e.g., amplifier gain)
- Track the history of repeaters' performance indices
- Maintain up-to-date repeater connection map and RMS-wide statistics on performance indices and abnormal RF spectra (by plugging in FineREM_RFMS)
- Monitor the RF environments around repeater(s) (by plugging in FineREM_RFMS)
- Monitor the RMS server and network devices (e.g., CCU) status

Versatile to support various environments, protocols, languages and interface

- Client/server environments
 - ✓ Client : Windows- or web-based applications
 - ✓ Server : Unix/Linux or Microsoft Windows server
- Applications supported in multiple language environments
- Communication protocols : TCP/IP, UDP, SMPP, SNMP
- Comm. interfaces : Ethernet, HDLC, ATM, E1, RS-232C, dial-up modem, DTMF

Specifications

Items	Specifications
Repeaters compliant with FineREM_RMS	Analog optical repeater Digital optical repeater In-door, out-door DAS (Distributed Antenna System) RF repeater ICS repeater Microwave repeater
Managing capacity	Over 30,000 units
